# List of guests

## Summer semester 2013

16/04/13	Karsten Kruse	University of Saarbrücken	The actin cortex - an example of active wetting
30/04/13	Frank Jülicher	MPI Dresden	Active processes in cells and tissues
28/05/13	Christine Selhuber-Unkel	University of Kiel	Investigating dynamic processes in parasitic Acanthamoeba
11/06/13	Oliver Lieleg	TU Munich	Biological hydrogels as extracellular diffusion barriers
25/06/13	Leonard Sander	University of Michigan	ECM alignment and cell motility
09/07/13	Samuel A. Safran	Weizmann Institute	Dynamic and non-linear effects in cell mechanics
02/09/13	Karin Jacobs	University Saarland	How superficial is adhesion? Experiments with geckos, bacteria and proteins
03/09/13	Gerhard Gompper	Forschungszentrum Jülich	Mesoscale simulations of biological microswimmers
04/09/13	Markus Sauer	University of Würzburg	Fluorescence localization microscopy – the transition from concept to biological research tool
